For a water connection of larger than two-inch size, the customer shall pay a fee for the cost of providing a tap, setting a water meter and inspecting the installation, as determined by the city prior to installation based upon a detailed estimate of such cost. This fee shall be the total amount to be paid by the customer to the city. The detailed estimate shall quantify all materials needed, including but not limited to pipes, valves, sleeves, meters, meter boxes or vaults, valve boxes, marl, and asphalt, each assigned the same unit prices as the city currently pays at the time of the estimate for the materials. When a customer who has received a prior connection requests a change in location of water or sewer service provided, the customer shall make application to the town for the new desired location and pay the applicable fee for a new connection. The customer shall then have the new service installed by the town or an approved utility contractor. The town or utility contractor shall remove the existing water or sewer service from the mains, and charge the customer time and material plus a 45% mark up for disconnection of old services.

Water Meters

Any meter or service entrance facility found to have been altered, tampered with, or bypassed in a manner that would cause such meter to inaccurately measure and register the water consumed, or which would cause the water to be diverted from the recording apparatus of the meter, shall be prima facie evidence of intent to violate and of the violation of this section by the person in whose name such meter is installed, or the person or persons so using or receiving the benefits of such unmetered, unregistered, or diverted water.
- (b) Any person violating any of the provisions of this section shall be guilty of a misdemeanor.

Certain deadlines must be met for water service to be cut on during regular working hours. If a customer fails to meet the appropriate deadline, water service will not be cut on outside regular working hours unless a situation exists that jeopardizes the health of the customer. The city reserves the right to determine if water service is cut on outside regular working hours. Services will not be restored until the account is paid in full (both the previous and current amount). Reconnection of water service, in all cases, shall be made after payment of the entire bill to include a reconnection fee of \$50. A 5% monthly late fee will be charged on all accounts that are 30 days past due.

Leak and Breakage Adjustments

No relief or adjustment shall be applied to water bills in cases of high water use due to leaks, broken lines, faulty plumbing, and the like; but if such leaks or breakages are verified to the satisfaction of the town manager or utility director, that person may make an adjustment to the sewer charge, but only if the extra water used did not re-enter the wastewater system for subsequent treatment. If adjustments are made, the amount of the

adjustment shall be the sewer charge for the difference between the increased gallonage and the average gallonage used during the twelve (12) months proceeding the increased usage period. A customer is entitled to 1 adjustment per year.

Water and Sewer Variable Metered Rates

Basic water and sewer rates for monthly billing inside the city limits shall be as follows:

In such cases, the sewer rate charge shall be based upon metered sewage flow at the same rate as that measured by metered water flows. The cost of installation of a sewage flow meter shall be borne by the consumer at the same rate and manner as other such charges set forth by the town.

Where sanitary sewer service is provided by the city without benefit of metering the following minimum monthly rates shall apply:

Water/Sewer/Facility Fees

Policy: This policy is to help clarify when a customer is to be charged Facility Fees.

1. **NEW CONSTRUCTION, MODIFICATIONS TO EXISTING STRUCTURE, CHANGE OF USE, EXPANSION AND REDEVELOPMENT**
Prior to issuing a building permit and preferably early in the discussion process with an individual wishing to perform new development or rehab of existing, the Operations Director or his appointee shall look at the development plans and determine if facility fee charges are applicable.
2. **NEW CONSTRUCTION TO PAY IN FULL PRIOR TO RECEIVING WATER SERVICE AND A BUILDING PERMIT -** All new commercial and residential construction, modifications, changes of use, expansions and redevelopment shall pay the water and sewer fee, in total, prior to a zoning permit or building permit being issued. In the CBD, a policy was adopted to encourage development in the area and the payment of the facility fee may occur over an extended period per the policy.
3. **INCREASING METER SIZE AT AN EXISTING RESIDENCE OR COMMERCIAL FACILITY WITHOUT ADDING ONTO THE STRUCTURE -**
If an existing customer wishes to increase the meter size at their home or commercial facility without adding additional living space or commercial space, the customer will only pay for the cost of the new tap and meter at the time of application, (example – a homeowner wishes to increase the size of their connection from a ¾ inch meter to 1 inch meter in order to increase the pressure at their home. The customer would only pay for the new tap and meter at the appropriate rate at the time of installation. The existing meter and tap would be abandoned).
4. **INCREASING THE IMPACT OF AN EXISTING RESIDENCE OR COMMERCIAL FACILITY -** In the event that an existing business or residence increases the size of the structure, changes to a more intense use, or increases the impact on the system, the owner shall pay additional facility fees to account for the additional impact to the system. (Example – If an existing restaurant adds square footage or a single

- family residence adds a bedroom, the owner would pay for the additional square footage or for the additional bedroom. If a property goes from retail to a more intense use with an additional impact, the owner shall pay for the difference between the fee structure of the existing facility (at the current fee schedule) and the more intense use (at the current fee schedule).
5. **REDEVELOPMENT** - In the event that a home or a business is demolished, damaged beyond repair, or an existing tap is abandoned never to be used again and a new structure is constructed in its place or somewhere else on the system, the new construction would be exempt from the payment of a Water and Sewer Facility Fee so long as the new development creates no additional impact on the system. When the redevelopment creates an additional impact, the fee shall be the difference between the old development (calculated at current budget rates) and the fee required by the new development. No credit will be given for a lesser impact.
 6. **TRANSFERRING OF FEES** - Fees for development shall be non-transferable. As an example, when a restaurant leaves an existing location and moves to a new building or new location, fees shall be paid on the additional impact that is created at the new location. Any fees that were not paid at the original location would remain with that location.
 7. **RESPONSIBILITY OF OWNER OR LEASER TO PROVE FEES PAID** - The Town of Carolina Beach, currently maintains a record of facility fees paid for by each business or home. However, in the event that these records can not be located, it is up to the owner of the structure or the person leasing the facility to provide either a record of the fees paid or evidence of the type of development that existed.
 8. **AUDIT AND REMEDY OF VIOLATIONS** - The town reserves the right to audit businesses in Town to determine if an additional impact has been created at a business and to rectify the discrepancy between what was paid for and what is owed. Likewise, in the event that it is discovered that a residential unit has created a similar additional impact, additional fees shall apply. (Example – a restaurant has added additional square footage beyond what was originally approved by the Operations Department or it is discovered that a home office has been turned into a bedroom in a single family residence. In this example, the locations will have to pay the additional fee or revert back to the originally approved plan).
 9. **OTHER CAPITAL RESERVE DECISIONS NOT COVERED BY THIS POLICY** - From time to time, the Board may amend this policy. If a particular situation is not covered by this policy, the Town Council may review each situation on a case- by-case basis at a regularly scheduled meeting. At the direction of the Mayor, the situations that are not addressed by this policy will be placed on an agenda of a regularly scheduled meeting.
 10. **REFUND POLICY** – Impact fees that have been paid for a project will not be reimbursed after 18 months from the time that payment is made

Any person undertaking new development or converting an existing use to a new use that is to be connected to the city’s water and/or sewer systems shall pay a fee for individual or combined uses in accordance with the following user fee schedule:

<u>Type of Use*</u>	<u>Water</u>	<u>Sewer</u>
<i>Residential</i>		
All residential uses/bedroom	\$750.00	\$750.00

*Fees will also apply to any and all construction, new or additions to any site commercial or residential, that create a new or additional demand upon the public water and/or sewer facilities. Also applies to any site, building, whether commercial or residential that has any change of use.

In determining the volume of sewage from dwelling units, the flow rate shall be 120 gallons per day per bedroom. The minimum volume of sewage from each dwelling unit shall be 240 gallons per day and each additional bedroom above two bedrooms will increase the volume by 120 gallons per day. Each bedroom or any other room or addition that can reasonably be expected to function as a bedroom shall be considered a bedroom for design purposes. When the occupancy of a dwelling unit exceeds two persons per bedroom, the volume of sewage shall be determined by the maximum occupancy at a rate of 60 gallons per person per day.

(If builder covers lot with 40% impervious surface development fee would be $\$275.00 \times 40 = \$11,000.00$. If builder can retain 20% of the storm water on lot then he would receive 20% credit off the $\$11,000.00$; $\$11,000.00 \times 20\% = \$2,200.00$. Development fee would then be $\$8,800.00$.)
